Profile

My multimedia experience has encompassed the past 10 years. I am both a Designer and a Developer, meaning I have the ability to design the look of projects and implement them and/or take another person's design and make it function in video or animation or on the web. I've also created successful promotional campaigns in print. In addition, I have 11 years of Pro Audio work. I have the ability to direct or be directed. I'm both open minded and professional. I am extremely honest and hardworking. I always get the job done, and done right. I would be a great asset to any company or project that utilizes any or all of my various skills.

Web Experience

June 2001 - Current: simplisticallycomplicated.biz
